### DETAILED ACTION

Claims 1-7 are currently pending in this application.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 6-7, drawn to nucleic acids sequences, classified in class 536, subclass 23.5.
- II. Claim 5, drawn to polypeptides, classified in class 435, subclass 183.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, are patentably distinct from each other. The polypeptide of group II, the polynucleotide of group I, each comprise amino acid sequences and nucleotide sequences which are chemically unrelated, do not require each other for practice; have separate utilities, such as use of the group I polypeptide to catalyze a esterification reaction versus the use of polynucleotide of group I to make recombinant proteins versus polynucleotide in a hybridization reaction and are subject to separate manufacture and sale. The groups have acquired separate status in the art and separate fields of search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***Species Election***

This application contains claims directed to the following patentably distinct species of the claimed invention: A) SEQ ID NO: 4, 14, 27, 159, 185, 214, 240, 271, 301, 322, 354, 377 for polynucleotides and B) SEQ. ID NO: 5, 15, 28, 160, 186, 215, 241, 272, 302, 323, 348, 355, 378 for polypeptides.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species **(i.e., a single disclosed SEQ ID NO corresponding to the elected nucleic acids or protein group)** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-6 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1652

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
